

Our Drone Solution

Connected South Pacific is a premier provider of Drones, Custom Solutions, and Services, dedicated to empowering businesses and communities across the South Pacific region. We understand the unique challenges and opportunities of our islands, from vast agricultural lands and remote infrastructure to critical environmental and disaster management needs.

Our mission is to provide you with reliable, safe, and efficient drone technology to help you navigate these challenges and unlock new potential.

A Foundation of Trust and Expertise

Safety and professionalism are at the core of everything we do. We are proud to be CASA AU and PNG certified, a designation from the Civil Aviation Safety Authority of Australia/PNG that signifies our adherence to the highest standards of aviation safety and regulatory compliance. Our operations are led by Chief Remote Pilot Neel Lochunah, a highly certified professional with extensive experience in the field.

Under his leadership, every flight and every solution is meticulously planned and executed with precision and care, ensuring a safe and successful outcome for your project.

CERTIFIED BY CASA

Drone Sales: The Right Drone for Your Mission

We offer a curated selection of the industry's most advanced and reliable drones, tailored to the specific needs of the South Pacific. Whether you are a small business, a government agency, or a large corporation, we will help you choose the perfect drone to meet your operational requirements and budget. Our sales team provides expert guidance and comprehensive support to get you off the ground quickly and safely.

- **Agricultural Drones:** For precision farming, crop health monitoring, and targeted spraying to increase yields and efficiency.
- **Surveying & Mapping Drones:** For accurate land surveys, topographic mapping, and 3D modeling of construction sites, properties, and remote terrain.
- **Inspection Drones:** For safe and efficient inspections of infrastructure, power lines, and other hard-to-reach assets, reducing risk and saving time.
- **Custom Solutions:** We can source and provide specialized drones for specific applications like maritime security or environmental monitoring.

Drone Solutions: Tailored to the South Pacific

Our expertise goes beyond simply selling drones. We develop comprehensive, customized solutions that leverage drone technology to solve the unique problems faced by our region.

- **Disaster & Emergency Response:** Drones for rapid aerial assessment of cyclone or flood damage, search and rescue operations, and delivering critical supplies to remote areas.
- **Environmental Management:** Monitoring protected marine areas, tracking erosion, and assessing the health of forests and coral reefs.
- **Infrastructure & Utilities:** Conducting non-destructive inspections of bridges, communication towers, and power grids to ensure operational safety and continuity.
- **Agriculture & Fisheries:** Precision agriculture solutions for farms and aerial surveillance for sustainable fishing practices.

Drone Services: Your Remote Pilot on Demand

Don't want to manage your own drone fleet? Let our expert team handle it for you. Our full suite of professional services allows you to reap the benefits of drone technology without the investment in equipment or training.

- **Aerial Mapping & Surveying:** High-resolution orthomosaic maps, 3D models, and digital elevation data.
- **Data Processing & Analysis:** We don't just collect data—we turn it into actionable insights, providing you with detailed reports and visualizations.
- **Consultation & Training:** Expert advice on integrating drones into your business, and training programs to certify your own staff.
